

Enjoy the overall comforts of the newly updated and added European road map. The latest generation provides even more information alongside your route. The DVDs are only compatible with the BMW Business navigation system (SA 606). Digital road maps guide you quickly and reliably to your destination. At the same time, you are informed about hotels, restaurants, patrol stations and interesting sights.

- Maps in 2D display in addition to the normal arrow display (only for vehicles as of 03/2007)
- List of BMW service partners
- POI data base with 32 categories.

×	TMC-Service	

Free TMC service is not available in all the countries. For the reception of encrypted TMC services, BMW offers a country-specific "BMW ConnectedDrive" contract.

This DVD needs at least a firmware as of March 2005 in order to work correctly. If the symbols "Speaker", "Traffic Messages" (not in all countries available), "Start route guidance" and "Resume route guidance", are visible as shown in the picture, there is no need to update the current firmware.
